

MANDATORY FACE MASKS ARE INEFFECTIVE, DANGEROUS AND UNETHICAL

- Existing scientific evidence challenges the safety and efficacy of wearing facemasks as preventive intervention for COVID-19.
- Wearing a facemask has substantial adverse physiological and psychological effects including hypoxia • hypercapnia • increased acidity and toxicity • immunosuppression • headaches • decline in cognitive performance • anxiety • depression.
- Masks are unable to filter viral particles. N95 respirators are made with a 0.3 micron filter,

Coronaviruses are approximately 0.125 microns in diameter. Cloth masks were found to have low efficiency for blocking particles of 0.3 microns and smaller.

MASKS ARE DANGEROUS TO YOUR HEALTH

- Bacterial and fungal contamination accumulates on masks impacting microbial air quality of wearer.
- Moisture retention and reuse result in increased risk of infection and bacterial pneumonia.
- Off-gassing of detergents, synthetic dyes, toxic and carcinogenic chemicals, and microscopic nanoparticles of fibers from facemasks are inhaled directly into the lungs, setting the stage for inflammation and future lung problems.
- Masks cause low blood O2, a medical condition called hypoxia. Oxygen deprivation damages every single organ.

MASKS DAMAGE CHILDREN

- Infant and toddler development heavily rests on the ability to read facial cues.
- Masks constantly make children aware of some "threat" leading to lifelong trauma. Consequences of forced mask wearing are also psychological with problems such as: poor concentration • aggression • depression • anxiety among others.
- There are multiple and lifelong psychosocial, biological, and immunological risks for children and pupils with long-term wearing of masks.

RECENT NON-RCT MASK STUDIES WERE BASED ON FLAWED METHODOLOGIES

- "Studies" which use mathematical models are pure invention and lab materials tests are irrelevant to real-world outcomes."
- BBC medical reporter Deborah Cohen citing multiple WHO sources said "political lobbying" not "evidence" led them to change the WHO directive from Do Not Wear Masks to Do Wear Masks.

"To deprive a child's or an adolescent's brain from oxygen, or to restrict it (mask), is not only dangerous to their health, it is absolutely criminal. Oxygen deficiency inhibits the development of the brain, and the damage CANNOT be reversed."
 ~ Neurologist, Dr. Margarite Griesz-Brisson MD, PhD

MASKS CAN INCREASE THE POSSIBILITY OF INFECTION

STUDY AFTER STUDY SHOWS THAT WEARING MEDICAL FACE MASKS MAKE NO SIGNIFICANT DIFFERENCE IN PREVENTING THE SPREAD OF VIRUSES.

CLOTH MASKS OR MEDICAL MASKS WORN LONGER THAN 20 MINUTES ACTUALLY PROMOTE THE SPREAD OF DISEASE AND PUT YOU AT RISK OF GETTING SICK.

- Influenza like illness rates 3 times higher with cloth masks when compared to control group.
- Masks break up larger aerosols into smaller aerosols: the nebulization effect.
- Smaller particles float in air for longest, larger particles drop.
- The smallest aerosols which float in air for longest and contain most virions can directly reach the alveolar region in the lungs and **attack alveolar cells.**

MASKS ARE AN ENVIRONMENTAL HAZARD

- N95 masks are made from synthetic plastic fibers. Plastic is made

from petroleum and liquid gas. Masks are ineffective, harmful to the wearers health and have the carbon footprint of an elephant.

- Masks are littering cities, turning up in oceans and waterways prompting researchers to warn that masks may become the next "plastic problem."
- Studies estimate worldwide humans are using 129 billion face masks (3 MILLION per MINUTE) each month. Most masks are disposable, made from plastic microfibers that are not biodegradable.

"Masks are a political weapon disguised as a public health concern"
